

☒ ~~TF Replacement: User Admin Checks off Records Request after receiving auth form~~

As a User Admin, I can check off providers from a Pathfinders Account once I have received their signed authorization form, so that I can be sure that Pathfinders know the status of all their requests.

Wireframe: <https://live.uxpin.com/55e81a9b3ff16403169277abb85d719a8b95d059#/pages/24493842>

☒ ~~When I receive a signed authorization form from a pathfinder for a provider request, I can note that by changing that Records Request status to "Signed" the Provider Authorization Forms section of their account.~~
