☑ ~~TF Replacement: User Admin Views Pathfinders with newly added Record Requests~~

As a User Admin, I can see the Pathfinders who have added providers that I have not created authorization forms for yet, so that I can send them authorization forms to sign.

Wireframe: https://live.uxpin.com/55e81a9b3ff16403169277abb85d719a8b95d059#/pages/24488854

☑ ~~I can filter on Pathfinders that have "new provider requests", and only receive Pathfinders that have added providers that I have not created authorization forms for.~~

☑ ~~Pathfinders will appear on this tab regardless of their other statuses (no auth form, waiting, have recap), if and only if they have added a "new provider".~~

☑ ~~If I have checked off "Authorization Forms Sent" for all providers for a given Pathfinder, they do not appear on this list.~~
