User Admin Views Request History (Request History Enhancements Needed)

As a User Admin, I can view the history of a Request, so that I can better understand the status of a record request.

Wireframe: https://live.uxpin.com/a238c159251ee591036a0ad962f1527049cdeefa#/pages/30769764

☑ ~~For each line of the history, I can see the date the event occurred.~~

☑ ~~For each line of the history, I can see the User that caused the change.~~

If the change was caused by a file import, the name should be "Import".

☑ ~~I can see any status changes that have occurred.~~

I can see when a note was updated.

I can see when a new requestserviceid was generated. (If applicable)
